

MIS Computer healthcare

We are the sole source **bar coding
solution provider** for your hospital.

Together, bar code printers and the latest hand held scanners improve patient safety well beyond the Five Patient Rights. This coupled solution advances wristband patient tracking, prevents misidentification and secures medication distribution throughout the entire hospital; all while helping staff work within HIPAA privacy standards.

Some of our bar coding services:

- Site Surveys for best fit products
- Manufacturer Representation
 - All major brands
- Product Road Maps
- Product Evaluations
- Project Management
 - Work with the Project Organizers
 - Rollout scheduling and shipping time lines
- Detailed reporting to all involved parties as requested
